DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, drawn to virtual addressing schemes, classified in class 711, subclass 203.
- II. Claims 30 and 33-60, drawn to a hierarchical visualization, classified in class 715, subclass 713.

Inventions I and II are related as subcombinations as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. The instant case, invention I has separate utility, such as the concept of virtual addressing with respect to storage systems. This may take place separately from the other invention. Invention II is drawn to a view of a hierarchical configuration, which may also be implemented separately.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
